

Duro-Tuff™ Rolled Goods Single-ply Membrane from Duro-Last® Roofing

Duro-Tuff: the world's best PVC rolled goods, backed by the best warranties in the industry. An excellent choice for low-sloped projects that require a long-lasting, energy-efficient roofing membrane.

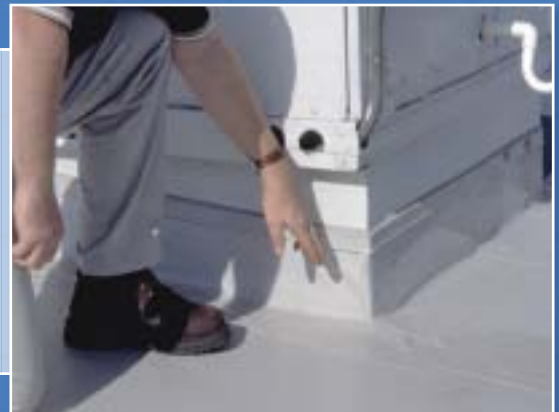

The Duro-Tuff single-ply membrane incorporates established membrane chemistry, an 18 x 9 weft-insertion scrim that provides exceptional strength, and superior film thickness above the scrim. These features combine to deliver excellent rooftop weathering performance and longevity. Duro-Tuff rolled goods enable an easier installation on challenging, cut-up roofs; roofs that are difficult to measure; and projects in cold or extreme weather.

Duro-Tuff rolls are available in these sizes

Color	Thickness	Width	Length
White	50-mil	2' 6", 5', 10'	100'
White	60-mil	2' 6", 5', 10'	100'

Precision-Fabricated Accessories: Superior Watertight Protection for All Installations

The Duro-Tuff membrane was engineered to be used with the complete line of Duro-Last's proven, precision-fabricated flashings for curbs, stacks, and parapets that ensure a watertight fit. Prefabricated flashings are manufactured from standard Duro-Last membrane material and feature a weft inserted scrim that provides puncture and tear resistance, and tensile strength at transitions - the most critical areas of any roof installation.

Time off the Roof™

Contractors can maximize the efficiency of installation crews with rolled goods and precision-fabricated components from Duro-Last. Rooftop flashings made in a Duro-Last factory allow for a highly efficient installation. For contractors, *Time off the Roof* means more effective utilization of labor and the ability to quickly move on to the next project. For building owners, it means an installation that is less disruptive to building operations.

Duro-Tuff rolled goods can be applied using a variety of methods.

Mechanical Attachment

Fasteners and plates are used to securely attach sections of membrane to the roof deck.

Duro-Bond® Induction Welding

A non-penetrating technology that bonds the membrane to a specially-coated fastening plate. Especially efficient when using 10-foot-wide Duro-Tuff rolls.

Adhered

Duro-Last offers several adhesive options for applying roof membrane to the deck surface.

The Best Warranties in the Roofing Industry

Duro-Tuff warranties provide security for virtually all commercial roofing applications. Multiple warranty options for Duro-Tuff installations are available, including 15 and 20-Year No Dollar Limit warranties that may be transferred and have no exclusions for ponding water. Duro-Tuff warranties are also available for installations in hail and/or high-wind areas.
